

AMENDMENT TO THE SPECIFICATION

On page 9, please replace the paragraph starting on line 5, and ending on line 18 with the following:

Conveniently, of course, in embodiments of the invention the ~~sensors~~sensor elements may be formed from a material different than the material of the actual pipeline material. For example, if the corrosion/erosion effects from the pipeline environment are to be monitored for a material different to that of the material of the pipeline the corrosion sensor is mounted, then the sensor elements may be for example, formed from sections or slices of another pipeline of the material of interest. Of course, in this embodiment the pipeline that the sensor elements are formed from may have similar dimensions as the pipeline the sensor is to be mounted in.

IN THE ABSTRACT

Please replace the abstract on file with the abstract presented herewith on a separate page
